EDUCATION

University of Virginia

Bachelor of Science in Computer Science, Minor in Data Science

Charlottesville, VA

Aug. 2023 – May 2027

- **Coursework:** Machine Learning, Software Development Essentials, Data Structures and Algorithms, Computer Systems and Organization, Discrete Mathematics

EXPERIENCE

Cashier

Wegmans

June 2021 – Present

Alexandria, VA

- Delivered fast, friendly customer service in a high-volume retail environment.
- Managed POS systems, including cash registers, scanners, and weight scales.
- Maintained accurate cash drawers and ensured end-of-shift balances matched transaction records.

PROJECTS

Eggs by the Dozen - ML Detection Tool | *Python, TensorFlow, HTML/CSS, Flask* January 2024 – May 2024

- Trained convolutional neural networks (CNNs) to detect and count parasitic eggs in microscopic images of fecal samples.
- Built a prototype web app using HTML/CSS and explored Flask-based deployment for ML model integration.
- Led dataset preprocessing and model tuning; achieved 90% training accuracy using limited labeled images.

Chess Game Outcome Predictor | *Python, scikit-learn, Pandas, Matplotlib*

Spring 2025

- Built a machine learning pipeline to predict chess game winners (White vs. Black) using a dataset of 20,000+ games.
- Engineered features such as rating difference, number of moves, and opening name; trained logistic regression and random forest models.
- Improved accuracy from 66% (logistic) to 71% (random forest); evaluated performance using confusion matrices and precision/recall metrics.

EXTRACURRICULARS

Society of Hispanic Professional Engineers (SHPE)

Member, UVA Chapter

Aug. 2023 – Present

Charlottesville, VA

- Engaged in professional development workshops, networking events, and community outreach to support Hispanic students in STEM.
- Collaborated with peers on technical challenges and career preparation for national SHPE conference events.

Association for Computing Machinery (ACM)

Member, UVA Chapter

Aug. 2023 – Present

Charlottesville, VA

- Participated in weekly meetings focused on coding challenges, algorithms, and software engineering best practices.
- Attended tech talks and project showcases to explore CS subfields and build connections within UVA's computing community.

TECHNICAL SKILLS

Languages: Java, Python, C, JavaScript, HTML/CSS

Frameworks: React, Node.js, Flask, JUnit

Developer Tools: Git, Docker, TravisCI, VS Code, Visual Studio, PyCharm, IntelliJ, Eclipse

Libraries: pandas, NumPy, Matplotlib
